EDITION 2019

## « Circular entrepreneurship, an economic model for the future »

The *REVADE*, International Wastes Recovery and Valuation Exhibition, returns this year in its 4<sup>th</sup> edition to put more emphasis on circular entrepreneurship and displays the theme: "*Circular Entrepreneurship, an economic model for the future*".

The importance and role of circular entrepreneurship, which consists in creating wealth from limited resources by implementing innovative solutions for waste management problems, thus contributing to the creation of the resources needed for economic development, encouraged us to put forward again this topic.

The results of a recent study done by the *Ministry of the Environment and Renewable Energies* and the report of the *Oxford Business Group* (April 2018), indicate that the amount of wastes produced in Algeria amounts to **34 million tons/year**. This represents a commercial value of **40 billion dinars** and the creation of **100 000 jobs** including **40 000 direct jobs** and this can not be done without the culture of circular entrepreneurship.

The *REVADE* exhibition offers a space for meetings and exchanges bringing together wastes management professionals, institutions and circular entrepreneurship supporting devices, research centers and universities.

Conferences, workshops, competitions, partnerships, signing of contracts and *BtoB* meetings will take place on **07, 08, 09 & 10 October 2019** during this event long awaited by the professionals of wastes management sector in Algeria.

Here is a presentation of the guidelines of *REVADE* exhibition.

**International Exhibition of Wastes Recovery and Valuation " REVADE " 07, 08, 09 & 10 October 2019**

Organizer and owner of the exhibition :
