

Autorità di Sistema Portuale
del Mare Adriatico centro settentrionale

Ravenna, 10th of March 2020

The Port of Ravenna is fully operational and the safety of traffic and crew members is guaranteed.

In full compliance with the latest provisions adopted by the Italian Government and as the safeguarding of public health has always been its first priority, the Port of Ravenna Authority would like to reassure that all necessary actions have been taken, aimed at guaranteeing maximum security during port operations and the traffic of goods.

The Port of Ravenna is fully operational and all its offices, including those carrying out inspections and controls, are guaranteeing the smooth running of their activities.

The approved decrees in no way limit the movement of goods in our country.

As confirmed by the Maritime Authority, the preventive obligation of "free medical practice" by the Territorial Office of Maritime Health is still necessary prior to the authorization of the docking of ships.
