**TO: LABOUR AFFAIRS COMMITTEE
ALL MEMBERS & ASSOCIATE MEMBERS
BIWEEKLY MEMBERS MEETING PARTICIPANTS
INTERNATIONAL ASSOCIATION GROUP PARTICIPANTS**

INFORMATION REGARDING ENTRANCE RESTRICTIONS AND INFORMATION FOR VARIOUS COUNTRIES

Action Required:

Members are invited to note information kindly shared by member associations and IMO regarding covid-19. Information is provided in relation to the following countries:

Germany	Kiribati	New Zealand	Russian Federation
Singapore	The Philippines	United Kingdom	USA

GERMANY

Members are kindly advised to note information attached at Annex G1 for a new Entry Regulation of the German federal government (currently only available in German) regarding entry registration and test obligations introduced today. Thanks are extended to VDR for providing this information.

The regulation stipulates that persons entering Germany who have stayed in a risk area in the last ten days before entry must register digitally in advance. In addition, there is a nationwide entry test obligation, according to which persons entering Germany must now present a negative test result no later than 48 hours after entry into the country (§ 3 para. 1). Entrants from risk areas with a particularly high risk of infection (high incidence area or virus variant area), proof of a negative test result must already be available upon entry (§3 para. 2)

The regulation contains several exemptions for seafarers. The most important are below:-

1. In the case of entries from risk areas, persons who transport persons, goods or merchandise by ship are exempt from the obligation to register and test if they comply with appropriate protection and hygiene concepts, § 2 par. 1 no. 4, § 4 par. 1 no. 1.
2. In the case of entry from high-incidence areas (at least a 7-day incidence of 200), there is an obligation for digital travel registration also for seafarers, § 2 para. 3. They are exempt from the testing obligation if they have stayed in the high-risk area for < 72 hours or will stay in Germany for < 72 hours (§ 4 para. 2 no. 3). In justified individual cases, the competent authority may grant further exemptions (§ 4 para. 2 no. 5).

3. In the case of entry from virus variant areas (risk areas in which new virus mutations are spreading which are not simultaneously widespread in Germany), there are no exceptions to the obligation to register and test. It must already be possible to present a negative test result upon entry (§ 2 Para. 4, § 4 Para. 3).
4. there are also general exceptions from the obligation to notify and test for entries from risk and high-incidence areas, if persons only pass through a risk area and have not had a stopover, or if they have only entered Germany for transit and are leaving again by the quickest route. These exceptions do not apply to entries from virus variant areas.
5. Quarantine obligations ordered by the federal states (Bundesländer) for entry from risk areas continue to apply.

Further questions should be sent to Wiebke Petersen (petersen@reederverband.de and/or T: +49 40 350 97 233 and/or M: +49 162 20 22 004).

SINGAPORE

Singapore MPA has promulgated Port Marine Circular 04 of 2021 (PMC 04) on the Requirements for Shore-Based Personnel Boarding Vessels at Anchorages, Shipyards, Terminals and Marinas, in the Port of Singapore.

PMC 04 supersedes Port Marine Circular 35 of 2020 with effect from 15 January 2021.

Requirements before Boarding a Vessel

Any shore-based personnel who is going on board a vessel **must produce proof that he/she has a valid negative test result from a COVID-19 Polymerase Chain Reaction (PCR) test** taken as part of the rostered routine testing (RRT) programme within the last 7 days, before boarding the vessel.

Shore-based personnel who are not enrolled on the RRT programme will be required to provide a valid negative test result from a COVID-19 PCR test or Antigen Rapid Test (ART) within 72 hours prior to boarding the vessel. COVID19 PCR test or ART may be done at any of the MOH-approved COVID-19 test providers:

<https://www.moh.gov.sg/licensing-and-regulation/regulations-guidelines-and-circulars/details/list-of-covid-19-swab-providers>

After disembarking, the shore-based personnel must take a PCR test between the 5th and 7th day, and a final PCR test on the 11th day.

All shore-based personnel must check-in and check-out with SafeEntry@Sea at the departure points or waterfront facilities, as appropriate. Enterprises must not deploy any of their shore-based personnel to do a job on board harbour craft or pleasure craft where that personnel had gone on board an ocean-going vessel in the past 7 days.

THE PHILIPPINES

The Filipino government has extended the period of the restricted countries from 15th to 31st January 2021. The countries on the list remain as per the last circular issued by ICS. The latest information is attached in Annexes PH 1 to PH5.

UNITED KINGDOM

Information has been published regarding actions of the UK Government on Covid 19.

A ban on travellers to the UK from South America, Portugal and Cape Verde was introduced today due to a new Covid variant identified in Brazil. The rules started at 04:00 GMT. British and Irish citizens and foreign nationals with residence rights can still travel but must isolate for 10 days. Chile, Madeira and the Azores will also be removed from the UK government's travel corridors list in response to the Brazilian strain of the virus. This comes alongside a decision to ban travel to the UK from several South American destinations, Portugal, Panama and Cape Verde in order to prevent spread of the new strain into the UK. The new travel ban applies to people who have travelled from, or through, Argentina, Brazil, Bolivia, Chile, Colombia, Ecuador, French Guiana, Guyana, Paraguay, Peru, Suriname, Uruguay and Venezuela in the last 10 days. Portugal, including Madeira and the Azores are also banned, along with Panama and Cape Verde. No end date has yet been determined. Several Central and South American nations had already restricted travel from the UK, including Brazil, Chile, El Salvador, Guatemala and Panama, while others such as Argentina and Uruguay have closed their borders to non-resident foreign nationals. Under the ban no exemptions will apply, including those for employment, and people living with someone who has travelled from one of the banned countries will have to self-isolate for 10 days.

Qatar and Aruba, Bonaire, Saint Eustatius and Saba have also been removed from the UK's travel corridor lists, meaning anyone arriving from these countries after 04:00 GMT on Saturday 16 January 2021, people returning to the UK from Aruba, Bonaire, St Eustatius and Saba, and Qatar will also need to self-isolate for 10 days upon arrival.

The Covid pandemic arrived in South America later than in Europe but it did so with a vengeance. In May, WHO warned it had become the new epicentre with Brazil soon joining the top three countries for confirmed cases . The travel ban is not about numbers; some countries have had relatively few Covid cases, like Guyana with under 7,000, but about the new strain and how it could spread quickly through travel in the region.

People currently in Aruba, Bonaire, St Eustatius and Saba, Chile, Qatar, Madeira and the Azores are encouraged to follow the local rules, return home as normal and check FCDO travel advice for further information. Concurrently the FCDO has updated its travel advice to advise against all but essential travel to Aruba, Bonaire, St Eustatius and Saba, Chile, Qatar, the Azores and Madeira. The UK government has said it will take decisive action, if necessary to contain the virus, including if the public health risk of people returning from a particular country without self-isolating becomes too high.

National restrictions for England introduced on 6 January 2021 remain in place, meaning everyone must stay at home unless travelling for a very limited set of reasons, including for work. This means people can no longer travel to take holidays or travel internationally unless for work or other legally permitted reasons. Those in breach of the rules face penalties starting at £200, rising to a maximum of £6,400.

The travel ban comes after it was announced a requirement for arrivals into England to test negative for coronavirus 72 hours before their journey will now come into force at 04:00 GMT on Monday. The Scottish government said the delay meant it would also wait until Monday. Wales and Northern Ireland should announce their own plans in coming days. Passengers from all destinations will also be required to present a negative COVID-19 test result before travelling to England to help protect against new strains of coronavirus circulating internationally and to identify those that may currently be infectious.

USA

Information has been published regarding actions being taken by the US Government.

Negative COVID-19 tests will be required for nearly all international air travelers from 26th January 2021. The head of the U.S. Centers for Disease Control and Prevention (CDC) approved an order on Tuesday expanding coronavirus testing requirements for nearly all international air travelers starting Jan. 26th 2021.

The new rules will require all U.S.-bound passengers age 2 and over to get negative COVID-19 test results within three calendar days of travel. The CDC will consider temporary waivers from testing requirements for travelers from some countries with little or no testing capacity.

The most relevant documents can also be viewed on their website at

<https://www.cdc.gov/coronavirus/2019-ncov/travelers/testing-international-air-travelers.html>

Attached also are the press release at Annex USA1 and the FAQ document at Annex USA 2 which more fully explain the requirements.

Please note there is no essential workers exception to these requirements which are placed on ALL air travellers inbound to the US.

Further information will be provided as it becomes available.

Press Release

For immediate Release

Kiribati extends its border closure until the end of February

Bairiki, Tarawa, 11th January 2021-----*The Government of Kiribati has officially declared a further extension of its border closure in response to the ongoing COVID-19 pandemic. The Government advises that this extension will remain effective until the end of February 2021 where it will be further reviewed. Special approvals is required for humanitarian flights to transport essential equipment, medical supplies and medevac operations.*

In addition, Kiribati nationals travelling back on government arranged repatriation flights can enter Kiribati. A Repatriation Taskforce setup by Cabinet has been planning recent repatriation exercises to bring back all I-Kiribati stranded overseas since November last year. The Taskforce is currently working with partners and neighboring countries to repatriate remaining stranded nationals and Seafarers who have been affected by the border closures as a result of the pandemic.

The undertaking is being conducted in accordance with Standard Operating Procedures that seek to safeguard the public from the potential entry and transmission of COVID-19. All repatriated nationals would be required to undergo mandatory quarantine at a Government-designated facility on South Tarawa.

Throughout the repatriation period, Kiribati borders will remain closed to foreign nationals unless specific directions are given to enable critical and lifesaving operations and activities in Kiribati. During the border closure, the provision of medical supplies and cargoes will continue under the established COVID-19 safety procedures and protocols to ensure necessary support to strengthen the national health system and to support the needs of the people.

The Government continues to appeal to the general public and Kiribati's development partners for their continued cooperation, support and understanding to ensure the necessary arrangements are strictly followed so that risks are managed and the health safety of all is not compromised.

Bei Einreise vorliegende Nachweise nach Absatz 3 sind auf Anforderung der mit der polizeilichen Kontrolle des grenzüberschreitenden Verkehrs beauftragten Behörden im Rahmen der grenzpolizeilichen Aufgabenwahrnehmung zum Zwecke der Überprüfung vorzulegen. Für Personen, die zum Zwecke einer Arbeitsaufnahme in die Bundesrepublik Deutschland einreisen, kann auch der Arbeitgeber oder ein sonstiger Dritter den Nachweis nach § 3 Absatz 3 erbringen.

(2) Personen, die sich in den letzten zehn Tagen vor der Einreise in einem Risikogebiet aufgehalten haben, für das durch das Bundesministerium für Gesundheit im Einvernehmen mit dem Auswärtigen Amt und dem Bundesministerium des Innern, für Bau und Heimat ein besonders hohes Risiko für eine Infektion mit dem Coronavirus SARS-CoV-2 festgestellt wurde, weil

1. in diesem Risikogebiet eine besonders hohe Inzidenz für die Verbreitung des Coronavirus SARS-CoV-2 besteht (Hochinzidenzgebiet), oder
2. in diesem Risikogebiet bestimmte Varianten des Coronavirus SARS-CoV-2 verbreitet aufgetreten sind (Virusvarianten-Gebiet),

haben bei Einreise einen Nachweis nach Absatz 3 mitzuführen und auf Anforderung der zuständigen Behörde im Sinne des Infektionsschutzgesetzes oder der von dieser beauftragten Behörde oder Stelle vorzulegen. Soweit die Einreise aus einem Risikogebiet nach Satz 1 unter Inanspruchnahme eines Beförderers erfolgt, ist der Nachweis nach Absatz 3 außerdem vor Abreise dem Beförderer zum Zwecke der Überprüfung sowie bei Einreise unabhängig von der Inanspruchnahme eines Beförderers der mit der polizeilichen Kontrolle des grenzüberschreitenden Verkehrs beauftragten Behörde im Rahmen der grenzpolizeilichen Aufgabenwahrnehmung auf deren Anforderung zum Zwecke der stichprobenhaften Überprüfung vorzulegen. § 2 Nummer 17 Halbsatz 2 des Infektionsschutzgesetzes findet auf die Feststellung von Gebieten nach Satz 1 entsprechende Anwendung.

(3) Als Nachweis gelten ein ärztliches Zeugnis oder ein Testergebnis hinsichtlich des Nichtvorliegens einer Infektion mit dem Coronavirus SARS-CoV-2. Der Nachweis nach Satz 1 ist auf Papier oder in einem elektronischen Dokument, jeweils in deutscher, englischer oder französischer Sprache zu erbringen. Die dem ärztlichen Zeugnis oder dem Testergebnis nach Satz 1 zugrunde liegende Abstrichnahme darf höchstens 48 Stunden vor der Einreise vorgenommen worden sein. Nähere Anforderungen an die dem ärztlichen Zeugnis oder dem Testergebnis zugrundeliegende Testung werden vom Robert Koch-Institut im Internet unter der Adresse <https://www.rki.de/covid-19-tests> veröffentlicht.

1. Greetings from Maritime NZ

Happy New Year to everyone. We trust you've all had a pleasant start to 2021 wherever you are. We hope everyone managed to find some time to take a break after a hectic 2020 and you have returned ready and refreshed to face the year.

The COVID pandemic has changed our lives and while the country has adjusted well, the need to remain extra-vigilant remains as we guard against complacency and continue to strengthen and improve our COVID protections even further.

We look forward to working with you all throughout the year as we negotiate the inevitable challenges that will come our way, while continuing to keep the ports safe and the supply chain moving.

The Maritime Industry Update is issued weekly, usually in the second half of the week. However, publication days might change when there is a need to provide a quick update.

If you have any questions about updates, or suggestions for what you would like included, please contact Maritime NZ by emailing MNZCovid-19@maritimenz.govt.nz.

2. Guidelines for NZ workers aboard international ships

In the week leading up to Christmas, we sent an email to everyone containing guidance on PPE usage and other practices designed to safeguard the health of NZ workers and international seafarers.

If you missed it, please link to the document on [Maritime New Zealand's COVID-19 page](#). It is the first of the downloadable documents as you scroll down the page.

Please take a read as now is a good time to reacquaint ourselves with the safety precautions we all need to take as workers return from their break and re-establish their daily routines.

3. COVID-19 Public Health Response (Maritime Border) Order (No 2) Amendment Order 2020

Just before Christmas the Maritime Border Amendment Order came into force. Again we did send this out just before the break, but in case you missed it, we've included details below.

Key components of this amendment cover:

- the Director General of Health's permissions for granting permits for vessels to arrive in New Zealand
- the requirement to remain in isolation or quarantine on board a vessel
- the requirement for crew to wear PPE if they're likely to come within two metres of shore based crew
- when a person may be transferred from isolation on a vessel to a land based isolation facility
- the 50 metre vessel separation rule
- the obligation of persons undertaking necessary tasks on a vessel under isolation in relation to PPE and distancing, in accordance with guidance issued by the HSWA regulator.

The order can be accessed via the link below.

<http://www.legislation.govt.nz/regulation/public/2020/0329/latest/LMS437883.html>

4. COVID-19 testing reminder

In November we circulated information related to the updated testing order which outlined testing frequency at ports and the workers covered by these changes.

Anyone who spends more than 15 minutes in an enclosed space on an affected ship, and Pilots carrying out work on or around an affected ship, **will need to be tested every 7 days**.

An affected ship is one where people on board are required to be in isolation or quarantine under a COVID-19 Order.

Workers who need to be tested every 14 days includes:

- Stevedores who carry out work on or around an affected ship
- Persons who board, or have boarded, an affected ship
- Workers who transport persons to or from an affected ship
- All other port workers who interact with persons required to be in isolation or quarantine under a COVID-19 order.

It is important that port workers and those carrying out tasks within the port environment follow the testing regime that is currently in force.

Please contact Maritime NZ at MNZCovid-19@maritimenz.govt.nz if you have any questions.

5. New COVID-19 variants

As you know some of the new COVID-19 variants have been discovered in New Zealand's quarantine system.

It is important to note that existing testing, hygiene and PPE protocols should be strictly complied with and are currently deemed sufficient to protect people from the new variants.

Please contact Maritime NZ at MNZCovid-19@maritimenz.govt.nz if you have any questions.

6. Crew change update

Crew changes continued to take place over the holiday period, with 178 replacement and outgoing crew processed in December alone.

Industry consultation on the updated crew change process will continue this month and will be released to the industry once finalised. It is encouraging to see the process that we have been following continue to work well, however we are keen to get your input if there are improvements you would like to see.

Again, contact Maritime NZ at MNZCovid-19@maritimenz.govt.nz if you have anything you would like to submit.

7. Answering your questions

There are a huge number of stakeholders in the maritime industry and ports' supply chain, and all of you are affected in different ways by COVID-19 and New Zealand's response to it.

If you have questions you would like answered, please email MNZCovid-19@maritimenz.govt.nz by 5pm, Friday each week.
